

G.R. MANUFACTURING, INC. BLASTER

Full Job Description

G.R. Manufacturing, Inc. is seeking a talented **Blaster** to join a diverse team to support production and manufacturing.

The Blaster candidate will be responsible for painting production parts to specifications and quality standards.

Other key responsibilities

- Responsible for accepting only parts that are properly prepared for paint
- Responsible for manually moving parts through the painting, flashing, and drying sections of the paint system
- Responsible for the entire paint process including but not limited to:
 - mixing paints and solvents according to manufacturer's specifications
 - correct operation of automated mixing equipment
 - application of liquid paint to meet specifications using electrostatic and traditional paint guns
 - assuring that parts reside in the flashing and drying sections of the paint system for the specified time
 - inspection of work and correction to work as necessary
 - periodic cleaning/flushing of paint/solvent delivery systems as required
- Responsible for having maintenance of all paint system equipment accomplished as specified, whether scheduled with the Maintenance Department or as part of the paint work process
- Maintain cleanliness and organization of the paint system and work area
- Assist as needed in all areas of the paint line operation
- Follow the policies as outlined in the G.R. Manufacturing, Inc. Employee Handbook

Basic Qualifications

Candidate must possess a High School diploma or equivalent GED.

- Ability to lift up to 50 lbs.
- Ability to perform strenuous repetitive work
- Ability to work while wearing respirator and protective clothing
- Must pass pulmonary function test and respirator fit test
- Should possess an attention to detail and desire to produce high quality parts
- Ability to follow oral and written instructions
- Self-starter
